

Redefining Fastener Extraction

SATA

**MADE TO
CHALLENGE**

BOLT BITER

Firmly Grips any Rusted or Rounded Fastener

Struggling with a rusted, rounded or stripped screw head? SATA BoltBiter fastener extraction tools are the solution. SATA BoltBiter makes your life easier by redefining fastener extraction - reliably removing stubborn nuts and bolts. Unique fastener gripping technology extends the lifespan of the sockets compared to traditional fastener cutters.

BoltBiter - the innovative extraction socket system from SATA!

Minus-sized sockets (A) designed to fit extremely worn-down fasteners
Sockets Marked "A": minus-sized
Sockets Marked "B": standard-sized

High-visibility laser-etched markings for quick size identification

Chrome molybdenum alloy steel (Cr-Mo) for exceptional strength and durability

Hexagonal base for use with impact guns, ratchets, wrenches or pliers

Innovative tapered flutes for easy seating onto a damaged fastener

Bi-directional design removes or tightens damaged fasteners

Dual sized sockets work with both SAE and metric fasteners

Removes rusted and rounded fasteners

Black oxide finish to resist corrosion

Durability and Fastener Re-Use

The bi-directional design means the BoltBiter can tighten any fastener just as easily as it can remove it. The ability to re-use a damaged fastener makes the BoltBiter the perfect tool for specialized components. Innovative tapered flute openings allow the socket to easily connect with the fastener, eliminating the need for a striking tool and reducing jamming in the socket compared to traditional extraction. Minus-sized sockets fit a wide range of damaged fasteners.

Choose your BoltBiter Set

The BoltBiter sets come with a durable blow mold case for storage and organization. Sets include a 3/8" drive ratchet with quick release design for rapid socket removal. The ratchet flush mounted reversing lever allows user to change direction with one hand without removing the wrench.

23 Pc. 1/4" and 3/8" BoltBiter Set
