

Pliers automatically adjust when the handles are squeezed, allowing for one-handed operation

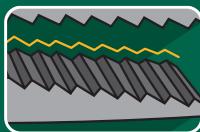

Multiple jaw positions for a greater range of applications

Slim head design for greater access in confined spaces

Interlocking joint design for greater stability during operation

Angled tooth locking plier pattern for superior grip

Chrome vanadium alloy steel (Cr-V) for exceptional strength and durability

# SATA Auto-Adjusting Water Pump Pliers

## UNLEASH THE POWER OF THE AUTO-ADJUSTING GRIP

Introducing the SATA Auto-Adjusting Water Pump Pliers available in three convenient sizes: 7", 10" and 12". Experience the perfect blend of cutting-edge technology, ergonomic comfort, and rugged durability.

These pliers are designed with an automatic adjustment mechanism that allows for seamless one-handed operation, saving you both time and effort on the job. The slim head design provides greater access to confined spaces, ensuring you can tackle tasks even in the tightest spots.

With multiple adjustment positions, the SATA Auto-Adjusting Water Pump Pliers cater to a wider range of applications, making them an essential tool for any toolkit. The interlocking joint design ensures greater stability during operation, keeping the pliers securely in place.

Additionally, the angled tooth locking plier pattern offers superior grip, allowing for a firm hold on any object, whether it is flat, curved, square, or hexagonal.

The anti-slip handle offers superior comfort and grip, reducing hand fatigue during extended use and maintenance is made easy thanks to the professional easy-clean dipped grips.

Constructed from high-quality chrome vanadium alloy steel, the SATA Auto-Adjusting Water Pump Pliers offer exceptional strength and durability, making them a reliable choice for any professional.

Whether you are working in tight spaces or handling various shapes and sizes, these pliers are designed to meet your needs with ease.

## Auto-Adjusting Water Pump Pliers

| Article Code | Description                          | Overall Length (mm) | Jaw Thickness (mm) | Overall Width (mm) | Opening Range (mm) |
